The Botanical Society of South Africa KZN Coastal Branch presents

THE GORGEOUS GREEN HOUSE

An illustrated talk **and/or** garden tours by
JANE TROUGHTON

Before

After

Jane Troughton and husband Greg Courtney may have built the most Gorgeous Green House in the country! Jane will be sharing the story of their journey, which is about more than putting some green technology into an old house but the overall process of developing a gentler and kinder way of living on the planet. Some highlights: energy independence - highs and lows, water harvesting and recycling, green design/architecture/building, how to install a roof garden, vertical garden and natural swimming pool. See Jane's blog: <http://gorgeousgreenhouse.wordpress.com/>
